

WHO CAN TAKE COLLOIDAL SILVER?

Since colloidal silver has no toxic side effects, it seems evident that anyone can take it, including adults, children, pets, and those currently taking prescription and non-prescription drugs. It has been successfully used by pregnant women and nursing mothers, but care should be taken not to exceed the recommended dosage.

APPLICATION OF COLLOIDAL SILVER

Colloidal Silver may be applied directly to the skin. A few drops on a wound or sore may be used as a disinfectant. Colloidal Silver may be administered orally, but it can also be atomized and inhaled into the nasal passages or lungs, it can be used vaginally, anally, or dropped into the eyes. It can be used externally on wounds and skin lesions to eliminate infection and speed up the healing process. Unless a severe infection warrants, it should not normally be used as an enema fluid because it can eliminate the friendly bacteria as well.

COLLOIDAL SILVER PRODUCTS

The problems of buying some colloidal silver products are:

Terribly overpriced products, many selling between \$2.00 and \$10.00 per ounce!
(You can make your own for the cost of the distilled water.)

Many products may be of poor quality containing perhaps only one or two parts per million of colloidal silver. When you make your own, you know what quality you have. FAMC has simple directions to tell you how.

When you make your colloidal silver at home you insure yourself good quality. Many commercial products may be old or have lost the quality of silver when it has settled out of solution.

FAMC has a complete home Colloidal Silver generator kit which includes:

- TWO GENERATORS
 - The Battery Powered Home Generator
 - The Electrical (115-volt) Generator
- TWO LENGTHS OF .999 FINE SILVER WIRE
- A DROPPER BOTTLE WITH SALINE SOLUTION (Made from Sea Salt)
- A SMALL SCRUBBER PAD FOR CLEANING THE SILVER WIRE AFTER USE.
- A PLASTIC SPOON (NON-CONDUCTIVE) FOR STIRRING YOUR COLLOIDAL SILVER.
- EASY TO UNDERSTAND INSTRUCTIONS

The kit contains everything that you need to make high quality Colloidal except the water. Your cost is only \$189.00 which includes the shipping and handling.

WORLD ORDER”**

WHAT IS COLLOIDAL SILVER?

Colloidal Silver is a tasteless, odorless, non-toxic, pure, natural substance consisting of submicroscopic clusters of silver particles, suspended by a tiny electric charge placed on each particle. In order to be taken internally and be absorbed at the cellular level, the molecule's size should be molecular. The particles do not settle but remain suspended since the electric charge exerts more force on each particle. Colloidal Silver is considered to be one of the most universal antibiotic substances known. Silver is known to kill some 650 different disease organisms. Antibiotics only kill around seven. Silver is non-toxic and has no known side effects when taken in the molecular particle size.

HOW COLLOIDAL SILVER WORKS

Taken orally, the silver solution is absorbed from the mouth into the bloodstream, then transported quickly to the body's cells. Swishing the solution under the tongue briefly before swallowing ensures fast absorption. In three to four days the silver will have accumulated in the tissues sufficiently for benefits to begin. Micro size silver in colloidal state particles easily penetrate and travel throughout the body. They act as a catalyst, disabling the enzyme that all one-celled bacteria, fungi, and viruses use for oxygen metabolism, "its chemical lung." Within a few minutes, the pathogen suffocates and dies, and is cleared out of the body by the immune, lymphatic and elimination systems. Unlike pharmaceutical antibiotics which destroy beneficial enzymes, colloidal silver leaves normal tissue cell enzymes intact because tissue cells have radically different enzymes than the primitive single-celled life. Thus, colloidal silver is absolutely safe for humans, animals, and plants.

HISTORY OF COLLOIDAL SILVER

In the early 1900's an antibacterial solution called Colloidal Silver became the choice of medical practitioners. It was safe to use without negative side effects, and was enormously effective against infectious organisms. Pharmaceutical companies developed antibiotics as we know them today, and silver took a back seat. Over the years the medical establishment has reported that there is a new strain of "Super Bugs" that cannot be destroyed by antibiotics. The antibiotics also kill the naturally occurring flora in the colon. Colloidal Silver does not disturb this very necessary environment. Because of new technology and much reduced costs in production, it may prove to be a better remedy.

SILVER USES BEFORE 1938

Below are some of the documented uses of silver for the treatment of various conditions and pathogens before 1938: acne, arthritis, bladder inflammation, burns, colitis, diabetes, diphtheria, dermatitis, dysentery, eczema, fibrosis, impetigo, influenza, intestinal trouble, lupus, lymphadenitis, malaria, meningitis, pneumonia, pleurisy, ringworm, rheumatism, seborrhea, septic ulcers, shingles, skin cancer, staph infections, strep infections, suduirs inflammation, tonsillitis, toxemia, tuberculosis, ulcers, warts, whooping cough, and yeast infections.

...“ There is a new strain of super bugs that cannot be destroyed by antibiotics.”

COLLOIDAL SILVER USES TODAY

In the last few decades, over 30 new diseases have appeared on the scene, including: various Cancers, Herpes, Epstein Barr, Ebola virus, HIV (AIDS), Dengue and many others. Creating a second immune system will ultimately diminish the chances of contracting any or all of these diseases. A compromised immune system needs a boost and a respite from the load it has carried. For centuries it has been known that silver, recently in colloidal form is a powerful antibiotic. Recent research has proven that colloidal silver is effective against over 650 pathogens. Pathogens are the downfall of diseased victims. A second immune system as Colloidal Silver provides would help fight off future and present infections.

Colloidal Silver has been used successfully on conditions such as:

- | | |
|--------------------|-------------------|
| Allergies | Anthrax Bacilli |
| Parasites | Blood Poising |
| Boils | Cornea Wounds |
| Chronic Fatigue | Meningitis |
| Candida | Cholera |
| Cystitis | Enlarged Prostate |
| Herpes | Hepatitis |
| Infantile diseases | Lesions |
| Leukemia | Lyme disease |
| Stomach Flu | Stomach Ulcers |
| Thyroid conditions | |

Colloidal silver is a broad-spectrum antimicrobial agent. Besides those bacterial, fungal and viral conditions already discussed, it treats the following partial list of ailments:

- | | |
|---------------|--------------------|
| Appendicitis | Bladder Irritation |
| Diarrhea | Ear Infections |
| Gonorrhoea | Hemorrhoids |
| Impetigo | Influenza |
| Nasal Catarrh | Parasites |
| Scarlet Fever | Chicken Pox |
