

Unravelling the New World Order

*An Exposé of How Government, Religious, and Financial Insiders
Are Deciding Your Future*

July 2011

THE COLD, HARD FACTS

As you read this, remember that approximately one-half of all households in the U.S. pay NO income tax. That's right—*zero*. Unfortunately, a good many voters still don't know this. The following five sentences are possibly the truest you'll ever read. They describe quite well the situation in this country today.

You cannot legislate the poor into prosperity by legislating the wealth out of prosperity.

What one person receives without working for, another person must work for without receiving.

The government cannot give to anybody anything that the government does not first take from somebody else.

You cannot multiply wealth by dividing it.

When half of the people get the idea that they do not have to work because the other half is going to take care of them—and when the other half gets the idea that it does no good to work because somebody else is going to get what they work for—that is the beginning of the end of any nation.
